

*Coffee Machine Solution*

*Professional Appliances Solution, by Everel*

**Electronic back-lighted switches  
with control boards**

**Everel**  
THE WORLD IN A CLICK

## Plus & Benefit

---

The Coffee Machine Solutions offered by Everel allows to add value to the appliances, both for technical, aesthetic and design features.

### **Stand by function**

The control board can be preprogrammed for switching off, according to the customer's needs. Allowing energy-saving that respects and optimizes even more the normal "stand-by" settings.

### **Coffee dose selector**

The consumer can choose his preferred size of the coffee, by selecting the quantity of coffee delivered (long or short).

### **Buttons' customization**

The coffee machine design can be valorized and made unique. The Electronic Backlighted Switches of Everel can be customized in colours and graphics.

### **Internal elements controller**

This solution allows to control separately and independently both: the boiler's resistance and the water pump.

## Applications

---

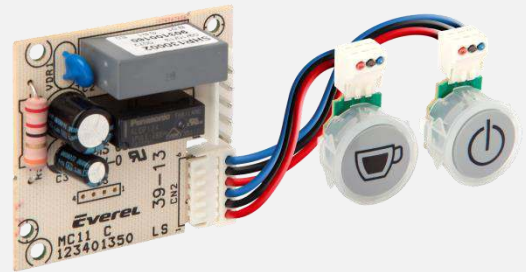

### **Domestic & Commercial**

- Coffee Machines
- Ovens: steam button, booster button

# Brand

“ The perfect outcome of a good Italian coffee, both pod or capsule coffee, highly depends on the machine used, and of course on the electronic and electromechanical components in it.

Everel's Solutions continue to be chosen by prestigious companies: **Didiesse** and **Capitani** represent two eminent success stories.

These companies realize high quality coffee machines for prestigious brands, on which are installed our innovative colorful and customizable backlighted switches and their related control board. ”
